

Hybrid Drumming

Drum Synthesizer (NordDrum)

Drum Synthesizer

- Drum Synthesizer
- Not sampler pad!!!
- Can only synthesize sounds and FX
- Can not load sounds
- Not a controller

Drum Synthesizer

- A Drum Synthesizer generates drum sounds from oscillators, envelopes, filters and FXs.

Nord Drum 3P

- Has 6 pads
- Preload sounds:
 - A-B drum kits
 - C melodic kits
 - D experimental kits and FXs
 - E-H blanks for storing kits
- Can connect one trigger

Nord Drum Basics

- Tone
 - The Tone Section is specialized for creating tonal and harmonically complex sound spectras and has four synthesis modes – Resonant synthesis, Subtractive Synthesis, Frequency Modulation and Ring Modulation synthesis.
- Noise
 - The Noise section is all about producing noise and is very powerful.
- Click
 - The Click-section is a specialized section for an ultra-short attack to the sound

Nord Drum Basics

- EQ
- Distortion
- Reverb / Delay
